WHO WE ARE

INOKAT LTD was established in 1989 and is based at Naousa, in Northern Greece. It specializes in production of food processing machinery and, more generally, in stainless steel constructions of highest standards, with its activity currently expanding beyond Europe.

The custom constructions offered by the company, the after sales service and its quality work are, up to this day, the elements that brought the company in a top position in the industrial and professional equipment industry.

WHO WE ARE

33 Years of experience

500 Industrial installations

50 Unique products

3000 Satisfied clients

HISTORY TIMELINE

1989

Bussines Opening

with the vision of manufacturing Food Processing Machinery

2003

New Facilities

Entering an all new manufactory to be able to respong to high demand

2006

Facilities Expansion

Creation of new production units

2010

Exports Expansion

New strategic directions along with new marketing vision, opened new opportunities abroad

2022

New Facilities Expansion

Preparations for new facilities expansion and new manufacturing equipment

SERVICES

OUR SERVICES

INOKAT LTD provides machinery and constructions that equip units processing and packaging:

Frozen Fruits - Vegetables
Washing | Separation | Sorting

Cooling of fresh products
Water cooling | Precooling | Hydrocooler

Canning products
Jams | Spoon sweets | Compotes | Precooking

Olives processing
Picking | Processing of table olives | Core removal and olive paste

Processing of snails - shells
Processing of snail meat fillets and snail shells

Washing machinery
Barrels | Crates | Fruits - Vegetables Washers

Meat processing
Meat processing machinery lines

Fish processing
Fish processing machinery lines

REALLY PROUD OF

HYDROCOOLER TECHNOLOGY

PRE-COOLING SOLUTIONS FOR FRUIT AND VEGETABLES

THE HYDROCOOLER SOLUTION OFFERS QUICK AND EFFECTIVE COOLING FOR SENSITIVE FRUITS AND VEGETABLES

The HYDROCOOLER uses cold water to keep fresh fruit and vegetables in top quality. It is distinguished for the economy in water and power consumption in which it operates.

It is constructed of AISI 316L quality stainless steel, in order to provide lower maintenance costs, excellent sanitization and longer service life. It can be adapted to all operational needs without any loss to efficiency and guaranteed product quality.
